## PROFESSIONAL SUMMARY

B.E. Computer Science and Engineering (Data Science) student at Atria Institute of Technology, graduating in 2028, with hands-on experience in Python, web development, data analytics and IoT projects. Completed a one-month internship as a Website Developer and Designer at Vasudevcore. Interested in opportunities across data science, analytics, AI/ML and software development.

## EDUCATION

**B.E. Computer Science & Engineering (Data Science)** — **Expected 2028**
Atria Institute of Technology, Bangalore — **CGPA: 7.5**

**Class XII / PUC** — 89%

**Class X / SSLC** — 80%

## TECHNICAL SKILLS

**Programming:** Python, C, Java (Intermediate)
**Web Development:** HTML, CSS, JavaScript (Intermediate)
**Data & Analytics:** Data Science, SQL (Intermediate); Machine Learning (Beginner); MS Excel (Advanced)
**Tools & Platforms:** Git & GitHub (Intermediate)

## EXPERIENCE

**Website Developer & Designer** | *Vasudevcore* — 1 month
• Worked on the design and development of the M.E.S Convent English High School website, including page layout, navigation and user interface.
• Focused on a professional, responsive and user-friendly website experience.
• Live website: mesconventtvk.com

## PROJECTS

**M.E.S Convent English High School Website** | HTML, CSS, JavaScript
• Designed and developed the school website, focusing on responsive layout, navigation and user experience. Live: mesconventtvk.com
**Smart Bus Crowd Management System** | IoT, ESP32/ESP8266, IR Sensors, GPS
• Developed a prototype for passenger entry/exit counting, crowd-level monitoring and GPS-based bus tracking.
**Placement Training LMS** | CYPHER 4.0 Hackathon
• Contributed to a learning management system focused on placement preparation and training.
**FoodWise AI** | Python, Machine Learning
• Worked on an AI-based concept for food-waste prediction, nutrition insights and waste-reduction recommendations.
**IoT-Based Smoke Detector** | IoT, Sensors
• Built an IoT safety-monitoring project focused on detecting smoke and indicating potential fire hazards.
**Smart Parking System** | IoT, Sensors
• Developed a smart parking concept to monitor parking-slot availability and support efficient vehicle parking.

## COURSES, CERTIFICATIONS & ACTIVITIES

**NPTEL:** Research Methodology and IPR (certificate available)
**Achievement:** Participated in CYPHER 4.0 Hackathon.
**Languages:** Kannada, English, Hindi, Tamil
